3+ Years experience in web application UI development, building websites in a fast-paced, collaborative environment. A self-directed, motivated front-end developer who loves building user-friendly websites and web apps with best practices.

> JavaScript | HTML5 | CSS | React | React Native | SASS | NPM | GraphQL | Git

▎Professional Experience

○ Littlefox (Seoul, Korea) / UI Designer, UI Developer   2017 - 2018

- Implemented pixel perfect HTML for a design across different web browsers and platforms.
- Translated designs and wireframes into clean and efficient code.
- Collaborated with the team on feature development, code reviews, and bug fixing.

Result : Had a good understanding of cross-platform compatibility. An enriched understanding of UI/UX concepts was acquired.

○ Whatever Search (Seoul, Korea) / UI Developer   2015 - 2016

- Developed and maintained responsive web applications leveraging front end development using HTML, CSS and JavaScript.
- Implemented user interfaces for multiple devices based on the design work.
- Transitioned static websites to responsiveness.

Result : Able to gain ability to balance multiple projects with the flexibility to adapt quickly to change.

○ Gensol Soft (Seoul, Korea) / UI Developer   2014 - 2015

- Worked on a variety of clients and project types.
- Collaborated with the design team to develop and optimize for a consistent user experience.

Result : Learned how to make a website accessible and became familiar with UX design while transitioning to a user-friendly website. Experienced building a large scale website.

▎Projects

Smart Movie Finder	Built a movie rating and organizing app with React, RESTful API and Material-UI.
Quick Budget	Created an expense tracker app using React, D3.js and Tailwind.
Kovan	A small group management app built with React Native.

▎Education

Langara college (Vancouver, B.C.)   2019 - 2020

Post-Degree Diploma, Web and Mobile App Design and Development (3.95 / 4.33 GPA)
